It's time to simplify; to revisit commonly held understandings of acquisition regulations.

It's time to explore more nimble, more efficient procurement.

It's time to modernize government information technology.

It's time to reimagine acquisitions, with NITAAC.

Call NITAAC or visit us on the web
before your next procurement.

More than just GWACs

NITAAC's three Government-Wide Acquisition Contracts (GWACs) boast streamlined acquisition and fast ordering, a single login electronic-Government Ordering System (e-GOS) with built-in FAR guidance and automated order completion, and ceiling rates/prices negotiated at the Master Contract level to be the best available. But that's not all NITAAC offers.

With over 20 years of experience in government-wide acquisition, we've learned a lot about innovation and are in lock-step with changing federal mandates and IT needs. That's why today, in addition to direct ordering, we also offer Assisted Acquisitions for agencies that need an extra hand during busy buying seasons or don't have a contracting officer. You'll find help from FAC-C Level III contracting officers and other acquisition professionals who will help you look for new ways to make your procurement a success.

To keep up with everything acquisition, download the NITAAC Go app from Google Play or the App Store. You'll have information about procurement events, training and acquisition support directly on your smartphone.

We're among the first agencies to offer Government-Wide Strategic Solutions (GSS) for laptops, desktops and accessories, a category management initiative by the Office of Management and Budget (OMB) that's offered through our CIO-CS GWAC. All three of our GWACs have been certified as Best In Class, a new standard of quality by the OMB that indicates preferred government-wide solutions.
